Spikeinu

Spikeinu.io

INTRODUCTION

Spike Inu is a community focused cryptocurrency project, consisting of Crosschain Swap, NFT market place, wallet, charitable purposes and so much more. consisting of proposes a Web 3.0 user management system that leverages public key signing to enable decentralized access control to data, servers, and/or applications. The system NFT Market place operates via an authentication procedure that verifies whether a given wallet contains a specific Non-Fungible Token (NFT).

By treating NFTs or fungible assets as tools for capturing on-chain data ownership, SPKI enables the creation of exclusive subscription and membership-based content, while also enabling a more autonomous, open, and intelligent method

Legal Disclaimer:

There is no offer to sell or solicitation to buy tokens in this whitepaper. Spike Inu is the project which consists of token, website, smart contracts and any related apps ("SPIKE INU") as presented in this conceptual paper. Spike Inu is not a licensed financial or payment service of any kind in any jurisdiction. Any terminology used in this whitepaper, affiliated website or within the app are intended only a basic reference only. SPIKE INU is a fully and completely decentralized.

THE PROJECT OPERATIONAL RIGHTS IS TO BE GIVEN TO THE COMMUNITY.

This presents boundless opportunities to unlock gains from the cryptosphere like never before. The future of the digital economy is driven by community. The shift in trends to meme coins has set a domino effect which offers new approaches to defining experiences with cryptocurrencies through community, rather than centralized methods. SPIKE INU empowers its community with utility tokens that give them a wide variety of benefits in the cryptocurrency ecosystem.

SPIKE INU include a, governance rights, farming, NFT marketplace, and vaults. These features ensure that the platform benefits all community members.

ECOSYSTEM

1. SPIKE TOKEN

An ERC20 meme token that fosters and promotes healthy and widespread usage and decentralization of the project through a specific reward linked to users' transactions involving decentralized wallets

2. SPIKE CROSSCHAIN SWAP

SPKI is a cross-chain on Web 3.0 authentication layer that fungible assets as a means of access for subscription services, loyalty rewards, and access management. The SPKI offers authenticated access to data, servers, apps, and content by leveraging public key signing via the new Web 3.0 stack. This proves to be a vast improvement over traditional Web 2.0 methodologies of hosting usernames and passwords in an unsecured a cross-chain trading platform deployed on many public chains (currently supports SOL,NEAR , BSC, ETH, OEC and POLYGON), with security, low transaction fees, fast speed. And this is for the first time, cross-chain transaction time is shortened to the level of seconds, which is an important milestone in the blockchain industry.

Money should never sleep but rather always flows efficiently. SPIKE's founding team entered the DeFi space in mid-2021 seeing how complicated and inefficient cross-chain transactions were. As the result, our team came up with the idea to build SPIKE SWAP with the goal of shortening cross-chain transaction time. Our team have successfully built the new network that allows cross-chain transaction times to be shortened to seconds! This is a major milestone and another major infrastructure improvement in the DeFi industry.

3. SPIKE NFT MARKETPLACE FOR METAVERSE

The NFT MarketPlace and Web 3.0 are booming industries with growing content and app providers. However, these providers still lack the important infrastructure and tools to increase user experience while maintaining data integrity and security. The industry needs a set of tools that can utilize NFTs for added value capture in a secure, transparent manner. The total addressable market (TAM) of SPKI ecosystem encompasses the most important customer engagement points in today's enterprises and commerce: subscription services, loyalty points, goods, access management, and community management.

The purpose of SPKI is to target and tackle issues throughout numerous marketplaces and industries spanning these multiple ecosystems as detailed below. The five markets listed above have over \$486 billion of capital already invested in them, or will be invested into these markets within the coming years. This opens up endless possibilities for SPKI to establish a strong foothold in these traditional markets while at the same time introducing entirely new business models using NFTs as the core functionality for Metaverse At SPIKE NFT market place, we're excited about a brand new type of digital good called a non-fungible token, or NFT. NFTs have exciting new properties: they're unique, provably scarce, tradeable, and usable across multiple applications. Just like physical goods, you can do whatever you want with them! You could throw them in the trash, gift them to a friend across the world, or go sell them on an open marketplace.

But unlike physical goods, they're armed with all the programmability of digital assets. A core part of our vision is that open protocols like Ethereum and interoperable standards like ERC-721 and ERC-1155 will enable vibrant new economies. We're building tools that allow consumers to trade their assets freely, creators to launch new digital works, and developers to build rich, integrated marketplaces for their digital assets. We are proud to be the next market for NFT

NFT in the Metaverse Virtual collectives and shared digital worlds are becoming the norm for today's consumers. This growth is so explosive that the market for digital spaces is expected to reach \$200 billion by 2028. Known collectively as the "metaverse", these spaces offer users infinite creativity and customization in creating brand new worlds to interact and share experiences with one another. NFT identifies the metaverse as a key component of the growing NFT space, and is uniquely positioned to provide improved functionality and usability for the growing industry.

5. SPIKE WALLET

On Web 3.0 SPIKE WALLET is a decentralized cryptocurrency storage wallet, has multiple layers of security built in as well as an intuitive user interface, allowing users to efficiently and securely store, send, swap, buy and trade their coins. SPIKE WALLET will support wide range of coins and tokens. Their Multi-coin wallet application will support Ethereum ecosystem blockchains, working roughly with ERC20, ERC721, ERC223, BEP20, TOMO, SOL, TRC20 tokens.

- **Simple Payment:** The payment is optimally simplified for users. Transferring coins is as easy as sending a message to anyone in any location on earth.
- **High Security:** Take full control of your assets with Biometric Security and Private Key – managed by yourself, none of your personal data is collected by the app.
- **Multi-asset management:** Spike Wallet fully supports popular blockchains
- **Instant Exchange:** Exchange many coins directly without transferring coins to the exchange
- **DApp Integration:** You can quickly access various DApps with just Spike Wallet

TRANSPARENCY & COMMUNITY

SPIKE INU is ownerless, completely decentralized and supported by the community. Open and frank communication is encouraged in the community. Members who support the project can be notified and even participate in step by step development of SPIKE INU. The project are result of the efforts of each member of our community. We will always acknowledge your contributions to the development of the project.

TRUST

In the crypto market, Trust is paramount. We are completely transparent not only in community support but also in step by step development of project

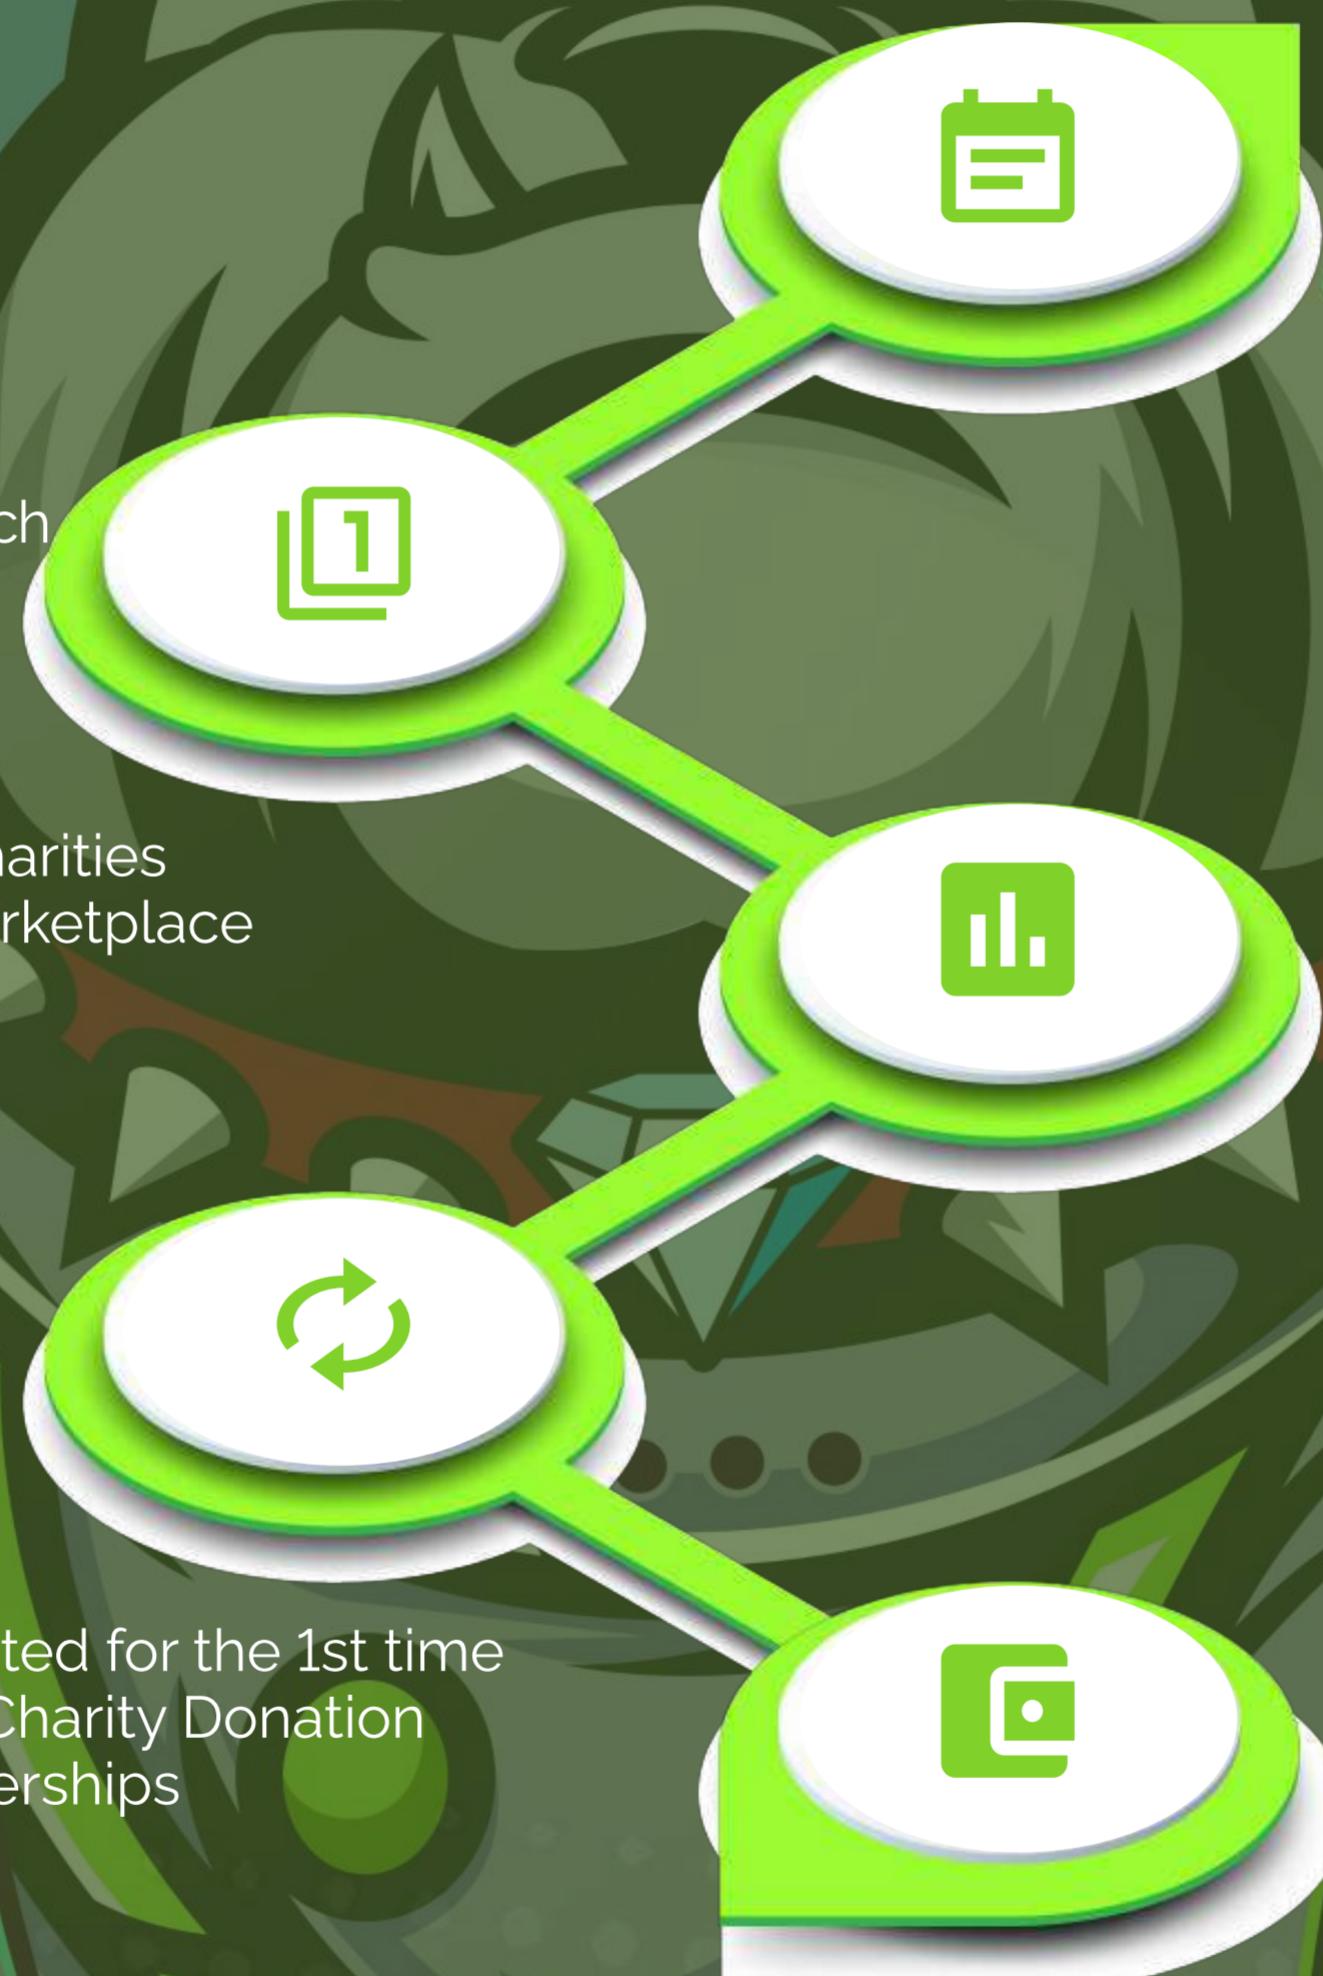

LONGEVITY

SPIKE INU is built to stay. We are developing all the hottest and most efficient apps that will bring the community with ease of use experience and efficiency.

ROADMAP

PHASE II

- 10,000 Telegram Members
- 5,000 Followers on Twitter
- Website Redesign
- 5,000 Holders
- SPIKE Crosschain Swap Launch
- Start building Spike multichain Wallet
- Vote for the 1st SPIKE INU
- Charity Donation
- Cooperate with the first 5 charities
- Start building Spike NFT Marketplace

PHASE III

PHASE I

- 3,000 Telegram Members
- 3,000 Followers on Twitter
- Website launch
- SPKI Uniswap listing
- 1,000 Holders
- Coinmarketcap Listing
- CoinGecko Listing
- Smart contract Audit

PHASE III

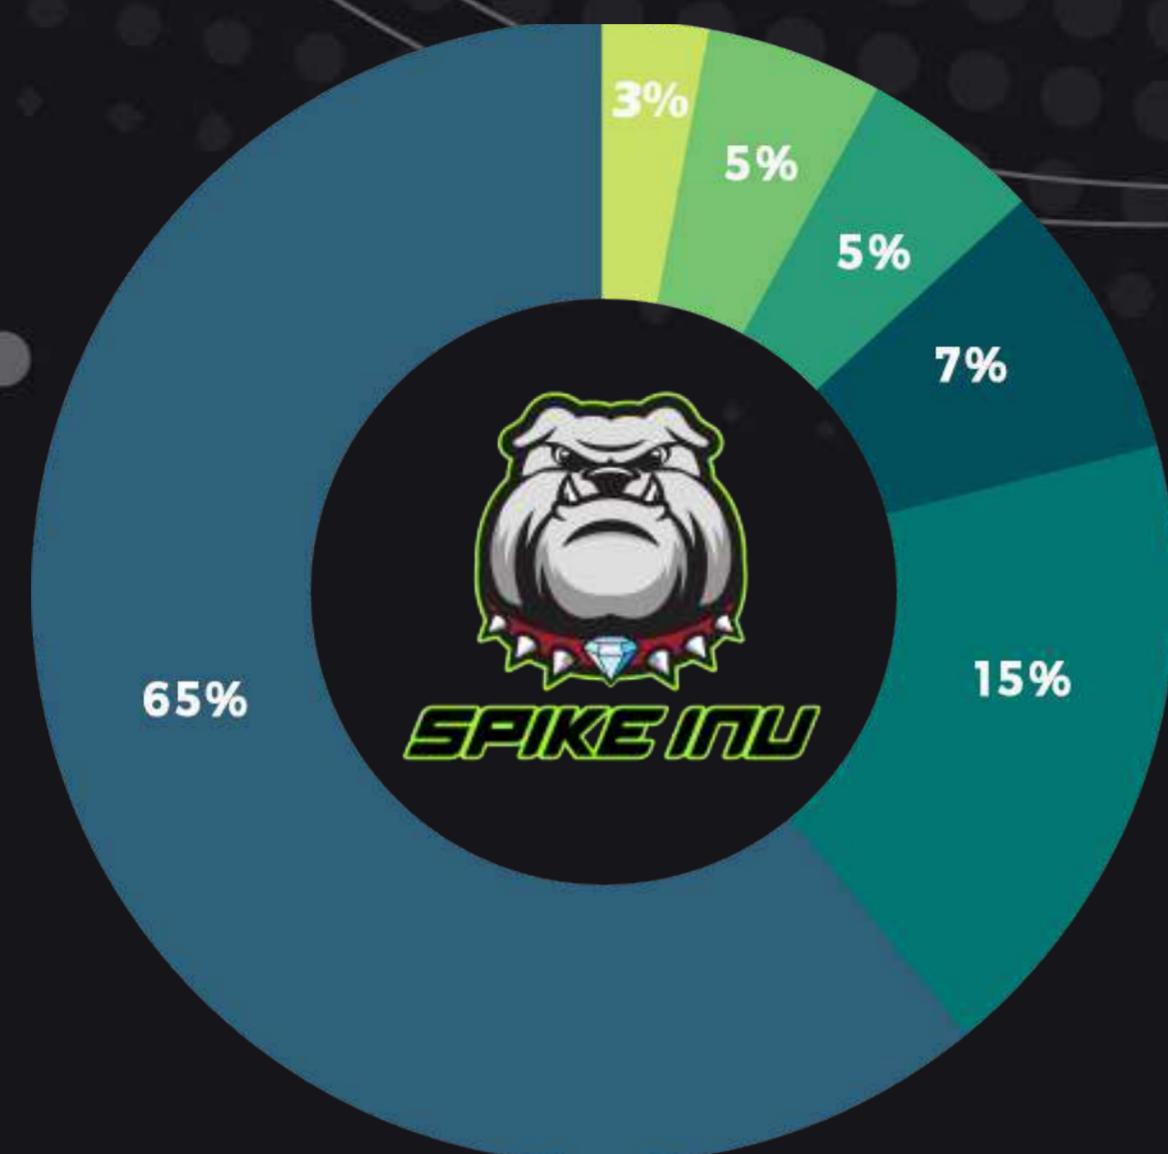

- 20,000 Telegram Members
- 20,000 Followers on Twitter
- Initial CEX Listing
- 10,000 Holders
- Expand Marketing development team
- Finding the new and potential partnerships
- Spike NFT Marketplace launch

PHASE V

- More CEX Listings
- Cooperation with 15 charities for the 1st time
- Donate to 5 charities that voted for the 2nd time
- Influencer Marketing
- Spike Multichain Wallet launch

TOKENOMICS

Total Supply: 1.000.000.000.000.000

3% Development
5% Charity & Airdrop
5% Marketing
7% Application Products
15% Burn at Launch
65% Liquidity Pool

Total tax for every Buy 5%

1% to Holder
1% to Charity
1% to marketing
2% auto add LP

Total tax for every Sell 10%

3% to Holder
1% to Charity
1% to marketing
5% auto add LP

ANTI WHALE

Holders only hold at most 2% of the total coins. We will use anti Whale system for bulk orders, Slippage to protect our small investors. Unlike most pump and dump coins in the BSC Network who have a high percentage of reflections to honey trap investors into holding for a short term, we are focused on the bigger and long-term goals of building a comprehensive ecosystem for crypto community. Our tokenomics encourage more traders to trade resulting in a high volume and increase in price hence more holders to hold.

Our Formula: Less transaction tax -> Lesser Slippage -> Higher Volume -> Higher

HOW TO BUY SPIKE'N UP

STEP 1: Create a MetaMask Wallet \$SPKI token is available on the Ethereum blockchain. MetaMask is a third party ERC20 (Ethereum) browser wallet, and the very best at that! On Google Chrome, visit metamask.io to download the extension and set up a wallet. On mobile? Get MetaMask's app for iPhone or Android.

STEP 2: Send \$ETH to MetaMask Acquire Ethereum through MetaMask itself or transfer it to your MetaMask wallet address from another wallet (e.g. Coinbase or Binance).

STEP 3: Visit UNI Swap. You can currently swap ETH and other tokens for \$SPKI on UNI Swap.

STEP 4: Swap \$ETH for \$SPKI. Enter the amount of \$ETH you would like to swap for SPKI. Click Connect Wallet then Swap.
